

# SCIENCE CLUB

## October 2009

10/5

### Flying Marshmallows

I have leftover marshmallows from summer s'mores. Need I say more?

10/12

### Mystery Endangered Animal

Maxine will help us learn some interesting facts about one of her favorite animals through art, games, and experiments. I am not telling you what it is but it is black and white and would have a very cold \_\_\_\_\_ if it sat on dry ice instead of water ice!!!

10/19

### Destructology

I have a book full of experiments that involve smashing, dropping and crashing things. So of course, we must.

10/26

### Geckos

Second year Club member Jack and his pet gecko start us off with the first student lead unit. Jack shares his expertise on all things lizard.
