

# SCIENCE CLUB

## January 2010

1/4

### Telescopes and Lenses

Tarn decided to expand his unit into the grinding and production of the lenses that go into telescopes. I can see we are going to have to look into this subject more carefully.

1/11

### Bones

Shavi has been boning up on her subject for several months. I hope I will not need her expertise next week when I go skiing.

1/18

### Martin Luther King Day- No class

1/23

### The Platypus

My son saw this fascinating animal when he was in Australia last year. Amanda O. is going to make us all experts on an animal that breaks all the rules of mammals.

Reminder: The \$100 fee for the Museum of Flight Mars Mission is due 1/29.
