

SCIENCE INVESTIGATORS

March 2010

3/2

Finish Reports

Once again our students will be the teachers.

3/9

Wonderful Wetlands

What is so special about a wet, soggy marsh? We unearth the secret life amongst the weeds, searching out the history and predicting our future because of this very important bit of land.

3/16

Local Amphibians

What is an amphibian? Why do scientists consider them to be bio-indicators to the health of the planet? Which ones might we find in a healthy wetland?

3/23

Field Trip to the Ben Rush Wetland/ Need Drivers

Today we take the measurements at our assigned wetland. We record all animal and insect life observed. We test the health of the water and record the plant life surrounding our area. This will be the eighth of yearly visits the school undertakes as wetland monitors. Come dressed for the weather; bring boots and binoculars if you have them.

3/30

Spring Break—Enjoy

Ready to sign up for another year of science? Science Club, a program for 2nd through 4th graders meets on Monday from 3:45 to 6:00 PM. The students plan and present their own curriculum with the help of a mentor teacher. The third year class sleepover is at the Museum of Flight.
