

SCIENCE INVESTIGATORS

September 2011

9/13, 9/15

The Scientific Process

After proposing a hypothesis, we will develop an experiment, make observations, discuss results, and record our conclusions. Bring something you would like to study under a microscope.

9/20, 9/22

Sound Waves

How so your ears pick up sound? How can we prove that sound travels in a wave and not a straight line? Bring something to class today that makes an interesting noise for our sound tape.

9/27, 9/29

Optics

Things are not always as they appear. Testing how the eye works with experiments in optical illusions, patterns and color.
