

SCIENCE EXPLORERS

November 2011

10/31, 11/2

Field Trip to Lake Hills Greenbelt Wetland

Monday and Wednesday afternoon we will leave school as soon as possible or you may meet us there by 1:00pm. I would like to start the Wednesday 3:45 class **at the green belt** at 3:45 to have as much daylight as possible.

Check for the sign-up sheet. This is a chance to explore the flora, fauna, and wildlife native to this area in a natural laboratory. Be prepared to walk. Come dressed for the weather, **we go rain or shine**. Bring a flashlight. (Required for the evening Class) Parents and siblings are welcome to join us.

11/7, 11/9

The World of Bats

We explore the myths and misconceptions of these fascinating flying mammals and do a little math along the way.

11/14, 11/16

Endangered Animal Games

Each year scientists estimate that about 1,000 species of plants and animals become extinct. What are the causes of this rapid disappearance of so many organisms? How do modern zoos try to make life in captivity stimulating and challenging for the animals in their care?

11/21, 11/23

Science Toys, Games and Recipes

A little of this, a little of that. Bring your favorites and we will explore the science that creates the fun.

Happy Thanksgiving to all!
