

SCIENCE EXPLORERS

December 2011

11/28, 11/30

Physics and Simple Machines

We continue to explore how things work and how we use some very basic machines and tools to work for us. We look into potential and kinetic energy. We harness some kid-generated kinetic energy for use in the classroom.

12/5, 12/7

Recycling and Pollution Solutions

Bring a sack full of your family's weekly recycling. We will weigh, sort, and reuse these throwaways in new and creative ways.

12/12, 12/14

Space

We take a trip through the solar system, a visit to all nine planets, and dealing with the realities of life aboard a space station. (How do astronauts go to the bathroom in space?)

Happy Holidays from all for us at Bellevue Country Day School. Classes will resume on Wed January 4th for all Explorer classes, 2012.

Snow Policy reminder: Check the school hotline (425-881-8899) or the website (bellevuecountrydayschool.com) and weather conditions to determine if class is being held.
