

SCIENCE CLUB

November 2009

11/2

Candy Science

Bring in four different pieces of candy from your weekend Trick or Treating. We will calculate the total amount of sugar gathered and then test for other chemicals in the goodies.

11/9

The Mystery of Batteries

Eric is planning to shock us with his experiments about batteries and electric currents. The truth behind a battery's secret source of power will be revealed.

11/16

The Chemistry of Acids and Bases

Ruby loves to get a reaction from the class. Do you think she can find the right chemistry to get us bubbling over with excitement?

11/23

Secret Agent Man

Patrick leads us into the science of spying. I hope we don't remain clueless. The fate of our snack hangs in the balance.

Next up in December: Ian and Tarn
